Subject: **Statement on Dog Illness in the Media**

Dear Clients,

We have always put our employees, clients, and dogs safety as our first priority. We learned of this "unknown illness" late last week and have been consulting with our in-house veterinarian, Dr. Swift who has assured us that our current strict procedures and guidelines will keep the animals in our care safe.

This illness seems to impact / spread to animals who have not been vaccinated. **We require every pet in our care to be fully vaccinated at least 2 weeks prior to their arrival to our facility.**

West Michigan K9 is safe, secure, and will continue to be open for business. We will continue to monitor the situation. We will work directly with our veterinarian to ensure that we are following all up-to-date protocols.

Thank you for your support and trust.
